**LETTER OF RECOMMENDATION**

Vasylieva Kseniia was the Union Leader of the Mechanics and Technology Faculty during the whole educational period in Kharkiv Polytechnic Institute from 2012 to 2018 academic year.

During the time of her work in the Students Trade-Union Organization, Vasylieva Kseniia proved herself to be responsible and reliable person. Also she showed and developed leadership and social skills, actively participated in the Union Leader School. Kseniia Vasylieva is distinct in calm and friendly character, which is proved by good relations she built with another students, as well as with academic teaching staff of our university.

In addition, Vasylieva Kseniia took active part in the university life, showed her creative skills in organizing of charity events, concerts and other events for the students.

Taking into account all of the mentioned above, I certainly recommend Vasylieva Kseniia to enter your university.

## LETTER OF RECOMMENDATION

I, Fedchenko Hanna Valeriivna, know Vasylieva Kseniia Yuriivna since 2012. I had a great pleasure to follow her progress in the process of teaching her number of the subjects, starting from geometric transformation, analytic geometry and, further, more complex subjects in specialty. Kseniia Vasylieva is ambitious and self-motivated person, who showed herself as clever and laborious student with analytical skills. She distinguished herself by nonstandard approaches to dealing with problems and fresh thinking. Her critical mind and sound arguments regarding her ideas convinced me that she differs from other students. That is why it was comfortable for me to be her scientific adviser in the work on the bachelor's and master's graduation papers, as well as on academic paper.

During the work on academic paper, Kseniia showed an outstanding scientific capabilities. Basing on a deep academic training and great labor motivation, she professionally applied theory in practice and general principles in specific tasks. In her paper Kseniia carried out a deep analysis of methods for design of visual effects for with polygonal network destruction. Researches and related conclusions carried out by Kseniia indicate on her scientific maturity.

This work was awarded with the I-st level certificate and was highly assessed by members of the State Examination Board.

All members of the department know Kseniia as strong personality with remarkable communicative skills. It is very simple to find an approach to Kseniia, because she is polite and level-headed student. She always showed her deep respect to her groupmates and lecturers. Also, Kseniia is a good leader and reliable team member.

I believe her motivation and willingness to choose the road of knowledge definitely help Kseniia to achieve a great success in further education. There is no doubt she will definitely perform any tasks and demands, required by your educational establishment. I am absolutely sure she does her best in order successfully to complete training.
